Enhance your hydrocolloid wound care with ALUROderm® Scar Patch - the only wound dressing that combines hydrocolloid technology with Allantoin 0.75%, Hyaluronic Acid, and Taxifolin. Designed for healthcare professionals seeking versatile occlusive wound care with added skin protectants for enhanced tissue support and reduced scar formation. Flexible, comfortable, and water-resistant, our 4"x4" dressing is the ideal choice for various low-to-mildly exuding wounds types.

Second Degree Burn Recovery with ALUROderm®

Patient-provided photographs documenting the wound healing progression of a second degree grease burn over a 6-week treatment period.
